

Meeting 2 Notes

Meeting Date: 5/08/26

Meeting Type: Requirement Refinement & MVP Scope Discussion

Objective: Review previously discussed requirements, finalize MVP features, capture additional customer expectations, and document implementation decisions.

2. Customer Requests & Requirement Updates

No .	Requirement / Request	Description	Priority
1	Advanced Portfolio Filters	Customer requested additional filtering capabilities to allow users to filter portfolio data based on currency, date range, and asset type.	High
5	Market Index Comparison	Customer requested displaying market index trends along with personal portfolio performance on the same line graph for comparison.	High
7	Dividend Management	Customer requested adding functionality to track and manage dividend-related activities within the portfolio.	Medium
8	Predictive Modelling Scope Change	Predictive analytics and forecasting capabilities were moved out of MVP and categorized as future scope.	Future Scope

4. Project Management Decisions

Area	Decision
Task Management	Kanban board will be shared on GitHub and maintained for tracking development tasks.
Work Tracking	Features, bugs, improvements, and technical tasks will be managed through GitHub issues/cards.
Development Workflow	Team members will update task status through Kanban stages such as To Do, In Progress, Review, and Done.

5. Updated MVP Scope After Meeting 2

Feature	Description	Status
Portfolio Dashboard	Display current holdings, portfolio value, and profit/loss information.	MVP
Transaction Management	Record and manage buy/sell activities.	MVP
Portfolio Performance Charts	Display portfolio growth trends over time.	MVP

Feature	Description	Status
Market Index Comparison	Compare personal portfolio performance with market index trends.	Added to MVP
Advanced Filtering	Filter portfolio analysis by currency, date, and asset type.	Added to MVP
Currency Handling	Support portfolio valuation in user's preferred currency.	MVP
Dividend Management	Track dividend-related portfolio events.	Added to MVP
Rich UI Experience	Modern dashboard with bold graphics and clear profit/loss visibility.	MVP
Portfolio AI Chatbot	Natural language interaction with portfolio data.	MVP

6. Future Scope Items

Feature	Description	Status
Predictive Modelling	AI/ML-based forecasting of future portfolio performance.	Future Scope
Advanced Recommendations	AI-based investment insights and suggestions.	Future Scope
Multi-user Platform	Expansion from single-user MVP to a large-scale platform supporting millions of users.	Future Scope

7. Open Items / Follow-ups

No	Action Item	Owner	Status
1	Create GitHub Kanban board for project tracking.	Development Team	Pending
2	Define supported market indices for comparison charts.	Team + Customer	Pending
3	Finalize dividend data model and workflow.	Backend Team	Pending
4	Finalize UI design for filters and portfolio analytics.	Frontend Team	Pending

8. Meeting Outcome Summary

The second meeting helped finalize the MVP direction. The customer emphasized that the application should provide meaningful portfolio insights through strong visualization, comparison with market trends, and flexible filtering capabilities. Advanced AI-based prediction features were intentionally moved to future scope to keep the MVP focused and achievable.

Final MVP Focus:

- Portfolio tracking

- Profit/loss visibility
- Transaction management
- Dividend tracking
- Advanced filtering
- Market comparison graphs
- Rich visual dashboard experience
- GitHub-based project tracking workflow

This can be directly added after Meeting 1 in your requirement document as "Customer Interaction – Meeting 2 Notes".
